srz - High-Performance Modular Rust CLI for Summarization

srz extracts and synthesizes structured summaries using local OpenAI-compliant LLMs.

Key Features: Universal Ingestion for Web, YouTube captions, local PDFs, and live news.

Private and Secure: 100 percent offline local inference with strict POSIX permissions.

Offline Library: Embedded DuckDB indexes every summary for instant full-text search.

Terminal Paging: Syntax-highlighted output with automatic terminal paging via less.

Interactive Grounded Q and A: Ask questions grounded on full source documents or past reads.
